Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

It is noted the instant application was filed as national stage entry of PCT/US05/06686.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, drawn to a gaming device having “a secondary display having a mask over an LCD display for masking selected portions of the LCD display to modify the shape of pixels on the LCD display”.

Group II, claim(s) 16-29, drawn to a method including “masking the square pixels to smooth edges of the pixels to provide a low-tech appearance to a viewer with an appearance of increased resolution”.

Group III, claim(s) 30-46, drawn to a mask product including a substrate having “a matrix of dots in the substrate that allow light to pass through the dots, wherein the dots are formed on the substrate in a position to smooth edges of display pixels”.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: According to PCT rules in a 35 U.S.C. 371 national stage application, inventions are distinct if at least one special technical feature is not in the other invention(s). In the instant application:

Group I and II are related as a product and method of using the product, where Group I includes the special technical feature of modifying the shape of pixels on an secondary LCD screen of a gaming machine, whereas Group II refers to a method of masking a display screen via placing or aligning a mask having stencils onto the display screen.

Art Unit: 3714

Group I and III are related as two distinct products, where Group I includes the special technical feature of modifying the shape of pixels on a secondary LCD screen of a gaming machine, whereas Group III refers specifically to the structure of the mask product, including a special technical feature not found in group I, such as "a matrix of dots in the substrate that allow light to pass through the dots, wherein the dots are formed on the substrate in a position to smooth edges of display pixels".

Group II and III are related as a method of using a product and the product itself, where Group I includes one such process of using the mask product of Group III. Group II includes the special technical feature of masking a display screen via placing or aligning a mask having stencils onto the display screen, whereas Group III refers to specifically the structure of the mask product, including the special technical feature not found in group II, such as "a matrix of dots in the substrate that allow light to pass through the dots, wherein the dots are formed on the substrate in a position to smooth edges of display pixels".

A telephone call was made to Bradley Forrest on February 19, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
